

## Reaffirmation statement

---

*SeaBOS is a unique collaboration between leading scientists and CEOs of global seafood businesses. Together we are leading a science-based global transformation towards sustainable seafood production and a healthy ocean.*

### AS STATED IN OUR 2016 COMMITMENTS:

*"...The potential of the ocean to help provide healthy food for hundreds of millions of people is tremendous. But bold and firm action is needed to make this happen. As the Keystone Actors in the international seafood industry, depending as we do on a healthy and resilient ocean, we know we can and must make a major contribution."*

We have established operational Task Forces, ambitious strategies, and bold time bound goals to help direct our actions and publicly report on progress. We are taking actions to drive impact through both short- and longer-term programs.

We, the undersigned, reaffirm our common purpose and desire to create transformative change across the seafood sector through our corporate stewardship and collaborative actions for a healthy ocean.
